

How Qflow helps you track progress towards BREEAM Materials and Waste credits

MAN 03

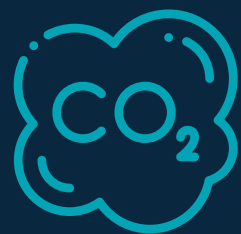

responsible construction practices

Qflow evidences the prerequisite that all timber is legally harvested and traded

Qflow proves what waste has left your site, what size truck it left in (where provided), and mileage for the most likely route taken

Qflow estimates waste transport emissions for you by applying a carbon factor from the ICE database

WST 01

construction waste management

Qflow proves that you are maximising the recovery of material during demolition and diverting non-hazardous waste from landfill

Qflow allows you to see the exact waste management results according to the Environment Agency Waste Hierarchy

Qflow calculates the diversion from landfill rates based on what facility waste is taken to and how the facility is licensed to manage that EWC code

MAT 03

responsible sourcing of construction products

Qflow proves exactly what materials have been delivered

Materials are **automatically audited** for compliance
